PROFESSIONAL SUMMARY

Software engineer with two years of full-time production experience delivering web, API, and mobile applications for United States clients. Backend focus in TypeScript and Node.js (NestJS) alongside PHP and Laravel, with PostgreSQL, Redis, Docker, and CI/CD pipelines. Formal training in Clean Architecture, Domain-Driven Design, and SOLID principles. BSc Software Engineering, expected October 2026. Seeking a backend or full stack engineering role in Germany; eligible for the EU Blue Card and available to relocate.

CORE SKILLS

Languages: TypeScript, JavaScript, PHP, SQL, C#

Backend: Node.js, NestJS, Express.js, Laravel (9-12), REST API design, ASP.NET Core

Frontend: React, Next.js, Tailwind CSS

Mobile: React Native (CLI and Expo), iOS and Android release management

Databases: PostgreSQL, MySQL, Redis

DevOps and Cloud: Docker, CI/CD pipelines, GitHub Actions, Amazon Web Services (AWS), Google Cloud Platform (GCP), DigitalOcean, Vercel

Testing: Unit testing, Integration testing

Architecture: Clean Architecture, Domain-Driven Design (DDD), SOLID principles, Microservices

Practices: Agile, Scrum, Jira, Git, GitHub, Code Review

Spoken languages: Arabic (native), English (professional working proficiency, IELTS [BAND] – [MM/YYYY]), German (A1, in progress)

PROFESSIONAL EXPERIENCE

Software Engineer | CSC Beyond, Amman, Jordan | 09/2024 – Present

Full-time. Custom software delivery for United States based clients. Client work is confidential; descriptions below are generalised.

- Design, build, and maintain production backend services in TypeScript (NestJS, Express.js) and PHP (Laravel 9-12), backed by PostgreSQL and Redis, across [NUMBER] client applications.
- Develop and release cross-platform mobile applications using React Native CLI, including provisioning, signing, and submission to the Apple App Store and Google Play Store.
- Build React and Next.js frontends in TypeScript, integrated with internally developed REST APIs.
- Containerise services with Docker and maintain CI/CD pipelines, reducing deployment time from [BEFORE] to [AFTER] minutes.
- Deploy and operate applications on Google Cloud Platform, DigitalOcean, Vercel, Railway, and Render; [NUMBER] applications currently running in production.
- Work in a two-week Agile cycle using Jira, participating in sprint planning, code review, and direct requirements discussions with English-speaking client stakeholders.
- [ADD ONE MEASURED RESULT — e.g. "Reduced p95 API response time from XXXms to XXXms by introducing Redis caching and eliminating N+1 queries."]

Junior Full Stack Developer | CSC Beyond, Amman, Jordan | 05/2023 – 07/2023

- Developed backend features in PHP and Laravel for client web applications.
- Built internal tooling and e-commerce integrations using Retool and Shopify.

Web Development Intern | AI Quintessential, Amman, Jordan | 03/2023 – 05/2023

- Built and maintained WordPress websites; contributed to UI/UX design workflows using Framer.
- Internship completed as part of the Orange Coding Academy full-stack programme.

SELECTED PROJECTS

[PROJECT 1 NAME] — Multi-tenant REST API | Live: [URL] · Code: [GitHub URL]

- NestJS, TypeScript, PostgreSQL, Redis, Docker. Layered architecture following Clean Architecture and DDD principles, documented through Architecture Decision Records.
- Integration test suite using Testcontainers against a real PostgreSQL instance; [XX]% coverage, enforced by a GitHub Actions pipeline on every pull request.
- Idempotent write endpoints, rate limiting, structured JSON logging with request correlation, health and readiness probes, and background job processing via BullMQ.
- Deployed on AWS (ECS Fargate, RDS, ElastiCache) with infrastructure defined in Terraform. OpenAPI specification published.

[PROJECT 2 NAME] — Cross-platform mobile application | App Store: [URL] · Google Play: [URL] · Code: [GitHub URL]

- React Native CLI application consuming the above API, featuring offline-first synchronisation, push notifications, and a real-time WebSocket channel.
- Automated signed release builds for both platforms via CI.

EDUCATION

BSc Software Engineering | Al-Zaytoonah University of Jordan, Amman / 10/2021 – 10/2026 (*expected*)
Studies paused during 2022–2023 to complete the Orange Coding Academy full-stack programme. GPA: [XX]%.

Full Stack Development Programme | Orange Coding Academy, Amman, Jordan / 10/2022 – 10/2023

- Seven-month intensive programme in JavaScript, PHP, Laravel, React, and Redux, followed by a one-month industry internship.

CERTIFICATIONS

- AWS Certified Developer – Associate (DVA-C02) — Amazon Web Services, [MM/YYYY]
- IELTS General Training — Overall band [BAND], [MM/YYYY]
- Backend Development: .NET, Clean Architecture, Domain-Driven Design, SOLID — Sky Software, [YYYY]
- Front-End Development: Angular and TypeScript — Sky Software, 08/2024 – 11/2024

VOLUNTEERING

- Guest speaker, Hashtat, Amman (2023) — delivered a career-guidance session on software engineering to prospective university students.

WORK AUTHORISATION

Jordanian national. Requires work authorisation in Germany. Eligible for the EU Blue Card under Section 18g of the Residence Act (shortage occupation and recent graduate salary threshold). Degree recognition: [state Anabin status once verified]. Available to relocate from [DATE]; notice period [X] weeks.
